FLOORING

MULTI-LAYER TILE FLOORING

www.woodlandlifestyle.com

What distinguishes Crete flooring from other flooring?

DECORATIVE CONCRETE LOOK TILES

Crete is a multi-layer floating flooring with decorative concrete patterns. Upgrade any residential or commercial project with expansive Crete tiles or combine with Herringbone planks for impactful flexible designs.

100% WATERPROOF

The commercial grade ISOCORE layer is 100% waterproof. ISOCORE delivers rigidity and strength yet is lightweight and dimensionally stable over large areas. Project owners and specifiers can rely on its outstanding performance for hospitality, education, offices, retail and other high use interiors.

EASE OF INSTALL WITH DROPLOCK 400™ SYSTEM

The robust Droplock 400™ system enables previously unavailable 'corner to corner' installation. The large tile format and integrated acoustical underlay facilitates a fast and easy install, reducing costs and providing outstanding in room and transfer acoustics.

CERAMIC BEAD OVERLAY WITH ULTRA-FRESH™

An overlay of microscopic ceramic beads combined with Ultra Fresh™ anti-microbial treatment provides superior wear resistance and controls the growth of unwanted microbes and odours.
